

CYBER RECONNAISSANCE & THREAT INTELLIGENCE

In today's interconnected world, businesses must adapt and find ways to identify and contain threats from outside of their perimeter. Early attempts to solve the problem with threat feeds or general threat intelligence have left security teams overwhelmed, frustrated, and still in the dark.

GroupSense is changing the face of threat intelligence. Our analysts are using proprietary, advanced technology to deliver customized intelligence aligned with each client's unique concerns. There are no tools to tune or threat feeds to interpret – just finished intelligence, so the response can begin immediately.

ABOUT OUR RESEARCH

GroupSense brings together extensive research capabilities, technology, and database of over 10 billion compromised credentials. Our cyber security lab uses proprietary techniques to collect and analyze big data from the cyber underground and open sources. Our powerful technology allows us to correlate and delivers a clear global view of each investigation. Our data collection and analysis is augmented by an integrated platform, where trends are identified, thus providing data for both reactive and preemptive security models.

ABOUT GROUPESENSE

GroupSense is a leading provider of cyber intelligence services. GroupSense is not a feed or search engine for the dark web. GroupSense is people, empowered by proprietary technology, helping information security and intel teams realize value. GroupSense is trusted by governments worldwide to assist in cyber intel program development, election monitoring, and anti-fraud and risk measures. GroupSense tracks known and suspected threat actors and groups, publishing its research for affected organizations regardless of customer status.

OUR EXPERTS

Kurtis Minder, CEO & Co-Founder

Kurtis Minder is the CEO and co-founder of GroupSense. With over 20 years in the information security industry, Kurtis brings a unique blend of technical, sales and executive acumen. A disciplined and focused leader, Kurtis has ably guided GroupSense in the development of an innovative approach to cyber intelligence. Drawing on his experience spanning operations, design, and business development, Kurtis has led GroupSense to market without significant fundraising.

Kurtis has served in pivotal roles at security startups and high growth companies such as Mirage Networks (acquired by Trustwave), Caymas Systems (acquired by Citrix) and Fortinet (IPO). A frequent contributor to the start-up community, Kurtis serves as an advisor and mentor to growing companies.

Tom Richards, Chief Strategy Officer & Co-Founder

Tom Richards brings over a decade of experience in the information security industry. Starting his career at Integralis (acquired by NTT), Tom held various positions in IT, operations and ultimately became a security analyst. After leaving Integralis, Tom was a senior business analyst with Verizon Business in Irvine, CA, where he was responsible for creating and securing systems for payment and order processing. In 2013, Tom founded ScoutSwarm, a cyber intelligence company focused on helping businesses proactively identify threats. ScoutSwarm was acquired by GroupSense, and Tom joined the founding team.

Currently, Tom is responsible for setting GroupSense's product strategy, and leading the team of analysts responsible for research, curation and discovery of information related to their clients' security. Tom holds a bachelor degree in Management Information Systems (MIS) from Central Connecticut State University.

CYBER RECONNAISSANCE SERVICES

GroupSense intelligence analysts can assess your current direct exposure across the full spectrum of online sources surface, deep and dark web. Clients receive assessments and 24/7 monitoring alerts to direct threats. GroupSense analysts are standing by to provide services such as additional research and investigation, threat modeling, tailored source access, takedown services and incident response.
